

Ashiana Public School

Sector 46-A, Chandigarh

This is with reference to the circular sent earlier regarding vaccination against Measles and Rubella.

Dear parents

Measles and Rubella are fast snowballing into an epidemic in India. To combat this, The Education Department is partnering with the Ministry of Health & Family Welfare to inoculate all school going children in the vulnerable age group of 9 months to 15 years.

Measles disease is a deadly disease and one of the major causes of disability or death in children. Measles are highly contagious and can make your child vulnerable to life threatening complications such as Pneumonia, brain fever etc.

Rubella is an acute, contagious viral infection. While the illness is generally mild in children, it has serious consequences in pregnant women causing foetal death or congenital defects known as congenital rubella syndrome (CRS).

Please Note:

- If your child is 9 months to 15 years, then this vaccination is vital and life saving.
- Your child should be vaccinated even if he has already been vaccinated with MR/MMR vaccine or either of the disease.
- The MR vaccine is given free of cost.
- The MR vaccine is safe and administered worldwide through MR vaccination campaigns.
- A team of Doctors and medical experts will be present at the time of the MR Vaccination Campaign in the school.
- There are no side effects.
- It is compulsory for all the children to be vaccinated, even if the same has already been done. However, if the parents want to be present at the time when the child is vaccinated, you may feel free to do so. The date and time for the same will be intimated to you later.

HELP THE GOVERNMENT TO KEEP YOUR CHILD SAFE AND HEALTHY!

Kindly fill the form given below and send it by 31st July 2017.

Ashiana Public School

-----X-----X-----X-----X-----X-----

I would like to be present in the school at the time of vaccination.

Name of the child: _____

Class: _____

Yes

No

Note: The parents who would like to be present during the campaign, might have to wait till the turn of their ward comes. Hence, we expect the parents to be calm and patient.
